SAP® Certified
Integration with Cloud Solutions

THE BEST RUN 

SAP certification focuses on technical integration with SAP solutions. Vendor is responsible for the product itself, its error-free operation, and adherence to applicable laws.

*CVA [SAP NetWeaver Application Server, add-on for code vulnerability analysis]: Uses static analysis techniques to discover potentially exploitable flaws. Due to the nature of software security testing, the lack of discoverable flaws does not mean the software is 100% secure. Vendor is solely responsible for fixing and maintaining the solution.
